

Bias Detection Report

This is a report introduction. The gender distribution in the Adult.csv dataset shows a moderate level of bias, with a Balance metric of 0.9157360598501509. This indicates that one gender is slightly more represented than the other, but the difference is not extreme. The Shannon entropy of 0.9157360598501509 also suggests a moderate level of uncertainty in the gender distribution.
