

# Bias Detection Report

Bias Detection Report for 'Status of existing checking account'

1. Bias Type: Distribution

2. Relevant Feature(s): Status of existing checking account

3. Bias Level:

- Entropy Analysis: Minimal bias (Normalized Entropy: 0.901)
- Max-Min Ratio Analysis: Moderate bias (Max-Min Ratio: 6.25)

4. Detailed Explanation:

- The entropy analysis indicates a relatively diverse distribution of account types, suggesting minimal bias.
- The max-min ratio analysis suggests a moderate level of bias, indicating that some account types are more frequently represented than others.
