

# Bias Detection Report

The bias type is Correlation, and the relevant feature is 'patient\_gender' and 'hospital\_expire\_flag'.

The results from the 'categorical\_numerical\_correlation\_max\_abs\_mean' tool indicate that the maximum absolute N value is 0.0037, which suggests a minimal correlation between 'patient\_gender' and 'hospital\_expire\_flag'.

The results from the 'execute\_python\_code' tool indicate that the Average Causal Effect (ACE) is -0.0009, which also suggests a minimal correlation between 'patient\_gender' and 'hospital\_expire\_flag'.
