

# Bias Detection Report

This is a report introduction. The purpose of this report is to detect bias in the Statlog dataset.

The balance measure for the 'Purpose' feature is 0.8027499944854378, which suggests that the feature is relatively balanced but may have some bias present. The bias level for the 'Purpose' feature is classified as 'Significant Bias', which suggests that there is a notable imbalance in the categories of the feature.
