

Bias Detection Report

This is a report introduction. The marital status distribution shows a significant imbalance, with one group being overrepresented. The Balance metric is 0.4643168400314407, which is less than 0.50, indicating a severe bias (Level 5). The Shannon entropy is 1.3035021662564983, which measures the uncertainty or information content of the categorical distribution.
