

Bias Detection Report

This is a report introduction. The bias type is Correlation, and the relevant feature is the number of people being liable to provide maintenance for. The bias level is Level 1, which indicates no bias.

The N-Sigma values for good credit and bad credit are 0.001972697548503897 and -0.004602960946509502, respectively. Since the absolute values of both N-Sigma values are less than 1, the bias level is classified as Level 1: No bias.
