

Bias Detection Report

Bias Detection Report for Dataset 'Adult.csv'

The analysis focused on detecting correlation bias between the features 'education' and 'race'.

Methods Used: Cramér's V and Statistical Parity.

Cramér's V Result: Level 1 bias, indicating no significant correlation.

Statistical Parity Result: Level 2 bias, indicating a low level of correlation.

Overall Bias Level: Level 2, meaning there is a low level of correlation between education and race in the dataset.
