

Bias Detection Report

This is a report introduction.

The bias type is Correlation.

The relevant features are Job, Credit amount.

The bias level is Level 2: Slight bias.

The N-Sigma values indicate a slight bias in the credit amount for the 'management / self-employed' job category, with a value of 0.766715. This suggests that individuals in this job category tend to have higher credit amounts than the overall mean. The bias levels for the other job categories are 'Level 1: No bias', indicating no significant correlation bias.
