Bias Detection Report

This is a report introduction.

The bias type is Distribution.

The relevant feature is Sex_Code_Text.

The bias level is Level 3.

The balance metric of 0.7584694479015508 indicates a moderate level of bias in the gender distribution, with a bias level of 3. This suggests that the gender distribution in the COMPAS dataset is not highly imbalanced, but there is still some degree of bias present.
