Bias Detection Report

The distribution of the DateOfBirth feature is not even, with some years having a much higher frequency than others. The max/min ratio is 9.999999999999998, which indicates a significant bias in the distribution. The entropy of the feature is 13.087557022126104, and the normalized entropy is 0.980944114604427, which indicates a high level of randomness in the distribution.
